

Two Variable Statistics Colloquium

September 7, 2021

For this assignment you will conduct a simple exploratory data analysis on a dataset **of your choice**. You will display your analysis in a report and give a brief (5 minute) presentation to the class.

Your presentation **must** include:

- Visualization(s) and summary of a Simple Linear Regression analysis

You are encouraged to typeset your report in L^AT_EX, and create your plots using R Studio/Python. Many interesting datasets may be found on the website [kaggle](#).

Presentations will be held on **Monday September 27**. Reports are to be submitted **before class begins**.
